- A little bit of : Python, SQL, C#...
- Studied at : Queensland University of Technology

Sumi-Portfolio-Website

MY WEBSITE

<https://sumi-dumi.github.io/sumi-portfolio/>

OBJECTIVE

- Develop my ReactJS coding skills, especially hooks
- Use a build tool 'Vite'

FOCUS

· UX / UI

One of the primary challenges I faced was effectively showcasing my dual abilities as a visual designer and coder in a visually prominent manner.

Additionally, consolidating and organizing both portfolios into a compact and easily navigable format posed another significant challenge.

· Coding

The primary objective was to ensure maximum responsiveness throughout the portfolio. This involved designing and implementing mobile-optimized layouts for all sections.

Among the various challenges encountered, the projects section presented the most complexity.

However, I tackled this challenge by employing efficient coding practices to minimize redundancy and repetition, resulting in a streamlined and concise implementation.

Sumi-Prev-Portfolio-Website

MY PREV WEBSITE

<https://sumi-dumi.github.io/main>

The screenshot shows a dark-themed website. At the top, there's a navigation bar with three dots on the left and the title 'Sumi-Prev-Portfolio-Website' on the right. Below the title is a large section titled 'MY PREV WEBSITE' in bold white letters. To the right of this title is a URL link. Further down, there's a bio section with a summary of the developer's skills and experience, followed by a 'THIS WEBSITE' button at the bottom.

The screenshot shows a dark-themed website. At the top, there's a navigation bar with three dots on the left and the title 'Sumi-Prev-Portfolio-Website' on the right. Below the title is a section titled 'PORTFOLIO' with two sub-sections: 'FRONT END' and 'GRAPHIC DESIGN & PHOTO EDITING'. To the right of these sections is a bio section with a summary of the developer's skills and experience, followed by a 'THIS WEBSITE' button at the bottom.

OBJECTIVE

- Develop my ReactJS coding skills
- Use build tool 'CRA'

FOCUS

· Coding

My primary objective was to practice utilizing hooks. The main challenge I faced was displaying different content in the body section based on the selected item in the navigation bar.

Additionally, creating a gallery sliding back and forth with the arrow button was challenging as well.

· Areas to improve

Since it's my first react project, I failed to build a responsive nav bar, which was solved in my next project.

Another aspect that required improvement was the optimization of the gallery. The server fetching large size photos was very slow. This was improved in my next project.

Furthermore, the design of the project appeared overly monochromatic. Despite aiming for a simple yet modern, sharp, and sleek website, the end result appeared boring and overly simplistic. This limited my ability to practice various functions.
